

## Poplar - The Tulip Poplar

### Liriodendron tulipifera

Application:	Poplar is very suitable for secondary purposes such as blind wood, extension slides, saunas etc.
Origin:	Eastern North America.
About the tree:	Growing to 40-50 m, diameter 180-250 cm.
Cutting:	Keflico can procure parallel sawn Tulip Poplar.
Quality:	FAS.
Density:	450 kg/m <sup>3</sup> at 12 % moisture.
Moisture content:	8-10 %
Thickness:	1 x 4" and thicker, 1¼ x 4" and thicker, 1½ x 4" and thicker, 2 x 4" and thicker.
Length:	6" and longer.
Properties:	Sapwood is wide and white, looks almost like Aspen. Heartwood can be seen in mineral stained colours in stripes and fields ranging from dark purple to red, green, or yellow. Colours tend to darken upon exposure to light. Interspersed, medium-sized pores. Straight, uniform grain.
Working properties:	Good workability. Takes paint well.
Contact us:	Please contact our sales department tel. +45 9813 3544 or info@keflico.com.
